Hiring Manager
Tanisha Systems

Subject: Application for Firmware/Embedded Engineer

Dear Hiring Manager,

I am applying for the Firmware/Embedded Engineer position at Tanisha Systems. My background in embedded firmware and secure IoT aligns well with your needs, particularly around arm, ble, c, can, embedded, firmware.

Highlights from my experience:

- 15 years of embedded firmware experience across ARM Cortex-M, ESP32, PIC, and 8051
- Strong C/C++, RTOS/FreeRTOS, board bring-up, and device driver development
- Secure IoT delivery with MQTT/TLS, AES/ChaCha20-Poly1305, and post-quantum crypto implementation
- Hands-on systems integration with UART/SPI/I2C/RS-485/Modbus and cloud telemetry pipelines

I have led end-to-end firmware work from architecture and implementation through validation and field deployment, including reliability-focused telemetry systems and hardware-software integration on resource-constrained platforms. I am comfortable working across cross-functional teams to deliver production-ready embedded solutions.

I am currently based in Brookings, SD and open to relocation.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience can contribute to your team.

Sincerely,
MANISH MAN SHRESTHA
